

## EXP-W10

The EXP-W10 is designed and approved to be used as part of a Security Grade 2 or 3 system. All remote intelligent expanders, they are intended to be used in wired alarm systems with i-onEX and current Menvier ranges of control panels at the heart of the system.

Benefiting from full diagnostics and fault reporting via the bus. Increased installation flexibility; with ten zones on board and suitable for a range of FSL values, two wire CC and four wire CC compatibility.

Transistorised outputs provided as standard on EXP-W10. Reduce maintenance times with the device locate feature using on board piezo sounders.
